SKILLS SUMMARY

- **Languages**: C, C++, Java, Python, PHP, JS
- **Frameworks**: HTML And CSS, React, Node JS.
- **Tools/Platforms**: MySQL, Git, GitHub
- **Soft Skills**: Problem-Solving, Communication, Adaptability

PROJECTS

Hospital Patient Record System – Advance DSA Project | GITHUB — Jun' 25

- Built a structured patient record management system enabling efficient handling of patient details, medical history, appointments, and treatment updates.
- Utilized optimized data structures for quick search, insert, and update operations to ensure fast and accurate retrieval of patient records.
- Improved system reliability through modular code architecture, error-handling, and efficient memory management for secure and consistent data processing.

Community Development Project | GITHUB — Jun' 24

- Conducted sessions to educate parents on the importance of schooling, leading to higher enrollment rates.
- Provided academic guidance, moral support, and basic educational materials to underprivileged children to improve their learning outcome.
- Partnered with NGOs and local authorities to maximize outreach and ensure sustainable community impact.

TRAINING

LPU – Advance Data Structure and Algorithms | LPU — Jun' 25

- Developed a strong foundation in algorithmic problem-solving and structured programming, applying optimized logic to solve complex computational tasks.
- Implemented core data structures and advanced algorithmic techniques to enhance code performance, scalability, and efficiency in execution.
- Strengthened analytical reasoning, debugging proficiency, and systematic approach to solution design through intensive hands-on practice and assessments.

Object Oriented Programming using C++| CERTIFICATE — Dec' 24

- Completed structured training in Object-Oriented Programming using C++, gaining practical proficiency in designing modular, reusable, and scalable software systems through effective application of OOP principles.
- Developed modular and reusable code solutions using C++ features including constructors, destructors, operator overloading, function overloading, and file handling techniques.
- Designed and implemented C++ programs focused on real-world problem solving while adhering to clean coding practices and efficient memory management.

CERTIFICATIONS

- Generative AI Professional | ORACLE — Sep' 25
- Cloud Computing | *NPTEL* — Mar' 25

ACHIEVEMENT

- CyberSec Symposium 2.0 — Apr' 24
  Participated in North India's largest cybersecurity conference organized by iGen Community in collaboration with LPU.
- *Won District Level Cricket Tournament*
  Represented School team and won the District Level Cricket Champion — Feb' 20
  Demonstrated strong teamwork, discipline, and leadership throughout the tournament.

EDUCATION

- **Lovely Professional University** — Phagwara, Punjab
  Bachelor. of Technology - Computer Science and Engineering *CGPA:6.75* — Aug' 23
- **SKMRD College** — Patna, Bihar
  Intermediate; Percentage: 74.2% — 2023
- **St John's Academy** — Patna, Bihar
  Matriculation; Percentage: 69.2% — 2021
